

Removing Task Data from a Scanner

1. Find the Task that has data in your scanner that you need to delete. In this example it is inventory transfers.

2. Click on the Clipboard Icon in the upper right corner.

3. Select your data record from the list that you want to delete. Then click the trash can icon.

a. The record will be deleted immediately with no extra confirmation, make sure you are certain you want to delete the record.
